

Announcing a new series NO-DIG ROAD SHOW 2008

The Objective: The NO-DIG Road Show is a series of one day events, comprising an integrated exhibition and seminar programme. The events are strategically located to offer three different audiences with an opportunity to participate in a high quality forum on trenchless technology.

The Format: Visitors will be invited to join the seminar programme and hear a selection of presentations designed to give a broad brush view of the latest techniques available, along with case study papers. The seminar programmes are compiled by the UKSTT.

The Exhibition: The trade show stands are an integral part of the day, providing delegates with an opportunity to meet key suppliers to the industry. The seminar programme is carefully structured to allow delegates ample time to visit the stands and all catering arrangements will be situated within or adjacent to the exhibition area.

The Audience: The venues have been selected to attract delegates from key areas where trenchless techniques are planned as an integral part of the future programmes of renewal and refurbishment of utilities and underground services.
